

Main

Welcome to the Amber Project!

The goal of this [Project](#) is to explore and incubate smaller, productivity-oriented Java language features that have been accepted as candidate JEPs under the [OpenJDK JEP process](#), including:

- [JEP 286](#) Local-Variable Type Inference
- [JEP 301](#) Enhanced Enums
- [JEP 302](#) Lambda Leftovers
- Other future JEPs

Resources

- [Amber Project](#)
- [Repositories](#)
- [Mailing lists](#)
 - [amber-dev](#)
 - [amber-dev Archives](#)
 - [amber-spec-experts](#) - For JSR Expert Group members only
 - [amber-spec-observers](#) - A read only clone of experts
 - [amber-spec-comments](#) - For submitting comments on the official JSR specs
