

Main

Welcome to OpenJDK 8 Updates!

OpenJDK 8 updates are a [separate project](#) of OpenJDK. [Andrew Haley](#) serves as the Project Lead. The list of Reviewers, Committers, and Authors can be found in the [jdk8u entry](#) of the OpenJDK Census.

Maintainers

- [Andrew Haley](#)
- [Andrew Hughes](#)

General Information

As a preamble, the project lead has established general [guidelines for working on jdk8u](#).

OpenJDK 8 updates will be delivered on the same established [quarterly cycle](#) used by Oracle i.e. "the Tuesday closest to the 17th day of January, April, July and October."

Development takes place in the [jdk8u-dev](#) Mercurial repository and should be the primary place for OpenJDK committers to submit their work.

Code from the development repository is regularly tagged and promoted to the master [jdk8u](#) repository, which is used to stabilize and deliver the quarterly releases. Distributors should use this as their primary source for creating OpenJDK builds.

For further process details, you may want to continue reading [here](#).

Contributing

New fixes should first be submitted to the development repository for the current version of OpenJDK, [jdk/jdk](#), first. Most changes submitted to the OpenJDK 8 project will be *backports* from this repository. Occasional exceptions are made when an issue only applies to 8.

Everybody is encouraged to submit fixes for OpenJDK 8 updates by dropping a mail to the [jdk8u-dev mailing list](#). Established community members will help new developers without commit access in getting their patch reviewed. For details on the process involved, continue reading [here](#). This page was written for OpenJDK 11 updates, but the same process is applicable for OpenJDK 8 updates as well.

Should you not be willing or not be able to drive a fix into OpenJDK 8 updates, you can still suggest changes. But by only doing that, you are at the grace of the community to pick up your suggestion.

Fix Approvals

In general, we follow the [common rules for the jdk-updates project](#).

If the backport requires more than just cosmetic changes (file location changes, copyright header updates) to apply to the 8u tree, it should first be submitted for review.

Push approval for a fix is then requested by setting the [jdk8u-fix-request](#) label on the original [JBS](#) bug. The maintainer will either approve this by setting [jdk8u-fix-yes](#) or reject it by setting [jdk8u-fix-no](#). Outstanding approvals can be monitored [here](#). If, and only if, the fix is approved, it may be pushed to the appropriate [jdk8u-dev](#) repositories. Approved fixes show up in this [JBS filter](#) (login required).

During the later stages of a release cycle, the release enters *rampdown*. The master [jdk8u](#) repositories contain the latest version of that release, while the [jdk8u-dev](#) repositories are used to start work on the next release. If a change needs to be pushed to a release in rampdown, push approval can still be requested using the [jdk8u-critical-request](#) label. As the name of this tag suggests, this process is intended for fixes such as major regressions that must make the release. More minor bugs and new features should go in the next release being developed in [jdk8u-dev](#). The maintainers may approve with [jdk8u-critical-yes](#), defer to [jdk8u-dev](#) or reject altogether. Outstanding approvals for critical fixes can be monitored [here](#). If, and only if, the fix gets approved with [jdk8u-critical-yes](#), it may be pushed to the [jdk8u](#) repository. Approved critical fixes show up in this [JBS filter](#) (login required).

At the end of the month prior to the release month, the [jdk8u](#) repository is declared frozen so embargoed security fixes can be added in private during the final few weeks. On release day, the final version will be pushed to the [jdk8u](#) repository and source bundles made available.

Repository Status

[jdk8u-dev](#): Development of 8u222. Pushes after [jdk8u-fix-yes](#) approval. Check [here](#) for clearance.

[jdk8u](#): Closed for anything other than regular weekly merges.

Timelines

OpenJDK 8u222

- March 2019: [jdk8u-dev](#) forest open (tag: [jdk8u222-b00](#))

- Wednesday, May 29th 2019: Rampdown; last merge from jdk8u-dev to jdk8u
- Wednesday, June 26th 2019: Last tag before code freeze
- Tuesday, July 17th 2019: GA; OpenJDK 8u222 released (tag: jdk8u222-ga)

OpenJDK 8u232

- Thursday, May 30th 2019: jdk8u-dev forest open (tag: jdk8u232-b00)
- Wednesday, August 28th 2019: Rampdown; last merge from jdk8u-dev to jdk8u
- Wednesday, September 25th 2019: Last tag before code freeze
- Tuesday, October 15th 2019: GA; OpenJDK 8u232 released (tag: jdk8u232-ga)

OpenJDK 8u242

- Thursday, August 29th 2019: jdk8u-dev forest open (tag: jdk8u242-b00)

Releases

Latest: 8u212
