

Quality Outreach report for December 2018

Quality Outreach Report introduction.

The first Quality Report was published in September 2015 [here](#), our initial intention was to provide a report every six months. We now release a new Feature Release every 6 months so we have decided to publish a Quality Outreach Report every three months.

The previous report was issued in September 2018 [here](#).

- Section one looks at the increasing number of FOSS Projects being added to the Quality Outreach wiki
- Section two lists Bug logging activities over the past three months (October 2018 - December 2018).
- Section three lists traffic on quality-discuss@openjdk.java.net
- Section four - lists JDK 12 Early Access testing experience of some FOSS Projects
- Section five - link to WorksLikeHeavenOnJDK11

1.0 FOSS Projects listed on Quality Outreach Wiki.

We now have **110** FOSS Projects and their developers listed on the Quality Outreach [Wiki](#) page, this is an increase of **2** FOSS Projects since the last report in September 2018. Note, we have a further 14 Projects that we communicate with that are not listed on the wiki i.e 124 projects in total.

All FOSS Projects receive regular updates when Early Access (EA) builds become available, they are encouraged to test and report back any issues they find during their testing.

2.0 Bugs logged since October 2018

Developers from **6** of the **124** participating projects filed **9** new issues in the JDK Bug System, thank you !

The number of bugs logged during the last three months has increased.

More information in the table below.

Priority	Fixed	Open	Duplicate	Not an issue	Total
P1	0	0	0	0	0
P2	0	0	0	0	0
P3	2	2	0	1	5
P4	0	3	0	0	3
P5	0	1	0	0	1
Total Unique Issues	2	6	0	1	9

Table above lists the number of bugs logged in total - 9 , of which 5 were P3 bugs, 3 were P4 bugs and 1 was a P5 bug.

Components	P1	P2	P3	P4	P5	Total
client-libs	0	0	3	1	0	4
core-libs	0	0	1	2	1	4
security-libs	0	0	1	0	0	1
Total Unique Issues	0	0	5	3	1	9

The Table above lists the number of bugs logged by Component . Bugs were found in core-libs, client-libs and security-libs components.

2.1 FOSS Projects logging significant bug

The following Projects have submitted significant bug reports in the last three months and deserve special mention:

- Apache Batik
- Apache Ant
- jOOQ
- Apache Derby
- PDFBox
- JOSM

2.2 Overall Summary of bugs filed to date by Projects.

Priority	Fixed	Open	Duplicate	Not an Issue	Incomplete	Won't Fix	Cannot Reproduce	Total
P1	12	0	0	0	0	0	0	12
P2	44	0	7	2	0	0	3	56
P3	72	12	22	18	3	4	6	137
P4	13	26	3	5	3	4	5	59
P5	1	1	0	0	0	0	0	2
Total Unique Issues	142	39	32	25	6	8	14	266

3.0 Discussion of the quality-discuss@openjdk.java.net mailing list

- Total 3 members participated in various discussions on the mailing list.
- Discussion threads
 - JDK 11/JDK 12 EA build Test Results - 10
 - JDK 12/JDK 8u202 EA availability - 4
 - Adding Apache CXF to the list of projects - 6
 - Incomplete resolution of bugs - 6

4.0 JDK 12 Early Access testing status

	FOSS Project	JDK 12 EA Builds	Comments
1	Apache Maven		vimeo.com/289706412
2	Apache Tomcat		Apache Tomcat mailing list
3	Apache Ant		Apache Ant mailing list
4	JaCoCO		https://github.com/jacoco/jacoco/releases/tag/v0.8.2
5	Apache Lucene		Apache Lucene mailing list
6	RxJava		RxJava 2.2.6 snapshot

5.0 - JDK 11 Ready : [WorksLikeHeavenOnJDK11](#)

The next Quality Outreach report is due in April 2019.
