

JDK11u

Welcome to OpenJDK 11 Updates!

OpenJDK 11 updates are part of the [JDK updates project](#) of the OpenJDK. [Rob McKenna](#) serves as the Project Lead. The list of Reviewers, Committers, and Authors can be found in the [jdk updates](#) section of the OpenJDK Census.

Maintainers

- [Andrew Haley](#) (Lead Maintainer)
- [Christoph Langer](#)

General Information

OpenJDK 11 updates will be delivered on the same established [quarterly cycle](#) used by Oracle i.e. "the Tuesday closest to the 17th day of January, April, July and October."

Development takes place in the [jdk11u-dev](#) Mercurial repository and should be the primary place for OpenJDK committers to submit their work.

Code from the development repository is regularly tagged and promoted to the master [jdk11u](#) repository, which is used to stabilize and deliver the quarterly releases. Distributors should use this as their primary source for creating OpenJDK builds.

For further process details you might want to continue reading [here](#).

Contributing

New fixes should first be submitted to the development repository for the current version of OpenJDK, [jdk/jdk](#), first. Most changes submitted to the OpenJDK 11 project will be *backports* from this repository. Occasional exceptions are made when an issue only applies to 11.

Everybody is encouraged to submit fixes for OpenJDK 11 by dropping a mail to the [jdk-updates-dev mailing list](#). Established community members will help new developers without commit access in getting their patch reviewed. For details on the process involved, continue reading [here](#).

Should you not be willing or not be able to drive a fix into JDK 11 updates, you can still suggest changes. But by only doing that, you are at the grace of the community to pick up your suggestion.

Fix Approvals

In general we follow the [common rules for the jdk-updates project](#).

If the backport requires more than just cosmetic changes (file location changes, copyright header updates) to apply to the 11u repository, it should first be submitted for review.

Push approval for a fix is requested by setting the [jdk11u-fix-request](#) label on the original [JBS](#) bug. The maintainers will either approve by setting [jdk11u-fix-yes](#) or reject by setting [jdk11u-fix-no](#). Outstanding approvals can be monitored [here](#). If and only if the fix gets approved, it may be pushed to the [jdk11u-dev](#) repository. Approved fixes show up in this [JBS filter](#) (login required).

During the later stages of a release cycle, the release enters *rampdown*. The master [jdk11u](#) repository contains the latest version of that release, while the [jdk11u-dev](#) repository is used to start work on the next release. If a change needs to be pushed to a release in rampdown, push approval can still be requested using the [jdk11u-critical-request](#) label. As the name of this tag suggests, this process is intended for fixes such as major regressions that must make the release. More minor bugs and new features should go in the next release being developed in [jdk11u-dev](#). The maintainers may approve with [jdk11u-critical-yes](#), defer to [jdk11u-dev](#) or reject altogether. Outstanding approvals for critical fixes can be monitored [here](#). If, and only if, the fix gets approved with [jdk11u-critical-yes](#), it may be pushed to the [jdk11u](#) repository. Approved critical fixes show up in this [JBS filter](#) (login required).

At the end of the month prior to the release month, the [jdk11u](#) repository is declared frozen so embargoed security fixes can be added in private during the final few weeks. On release day, the final version will be pushed to the [jdk11u](#) repository and source bundles made available.

Repository Status

[jdk11u-dev](#): Development of 11.0.6. Pushes after [jdk11u-fix-yes](#) approval. Check [here](#) for clearance.

[jdk11u](#): Stabilization of 11.0.5. Pushes after [jdk11u-critical-yes](#) approval..

Timelines

OpenJDK 11.0.4

- March 2019: [jdk11u-dev](#) repo open (tag: [jdk-11.0.4+0](#))
- Tuesday, May 28 2019: Rampdown; last merge from [jdk11u-dev](#) to [jdk11u](#)
- Tuesday, June 25 2019: Last tag before code freeze
- Tuesday, July 16 2019: GA; OpenJDK 11.0.4 released (tag: [jdk-11.0.4-ga](#))

OpenJDK 11.0.5

- Wednesday, May 29: 2019 jdk11u-dev repo open (tag: 11.0.5+0)
- Tuesday, August 27 2019: Rampdown; last merge from jdk11u-dev to jdk11u
- Tuesday, September 24 2019: Last tag before code freeze
- Tuesday, October 15 2019: GA; OpenJDK 11.0.5 released (tag: jdk-11.0.5-ga)

OpenJDK 11.0.6

- Wednesday, August 28 2019: jdk11u-dev repo open (tag: 11.0.6+0)
- Tuesday, November 26 2019: Rampdown; last merge from jdk11u-dev to jdk11u
- Tuesday, December 24 2019: Last tag before code freeze
- Tuesday, January 14 2020: GA; OpenJDK 11.0.6 released (tag: jdk-11.0.6-ga)

OpenJDK 11.0.7 (preliminary)

- Wednesday, November 27 2019: jdk11u-dev repo open (tag: 11.0.7+0)
- Tuesday, February 25 2020: Rampdown; last merge from jdk11u-dev to jdk11u
- Tuesday, March 24 2020: Last tag before code freeze
- Tuesday, April 14 2020: GA; OpenJDK 11.0.7 released (tag: jdk-11.0.7-ga)

OpenJDK 11.0.8 (preliminary)

- Wednesday, February 26 2020: jdk11u-dev repo open (tag: 11.0.8+0)
