

reviewer

Description

git-pr reviewer allows a pull request author to credit (or de-credit) a person as reviewer of a pull request. In most cases this is not needed since reviewers will review a pull requests using the source code hosting platform's tools. In rare cases however a review might be sent over e-mail and for those cases a pull request author might want to explicitly credit the reviewer.

Usage

```
$ git pr reviewer -h
usage: git-pr reviewer [options] [<ID>]
       --credit USERNAME  Credit a person as a reviewer of this pull request
       --remove USERNAME Do not consider pull request reviewed by this user
       --verbose          Turn on verbose output
       --debug           Turn on debugging output
       --version          Print the version of this tool
       -h, --help        Show this help text
```

Examples

Credit a person as reviewer of a pull request:

```
$ git pr reviewer --credit=rwestberg
```

Configuration

None.
