

close

Description

`git-pr close` closes (i.e. withdraws) a pull request.

Usage

```
$ git pr close -h
usage: git-pr [options] [<ID>]
    -u, --username NAME  Username on host
    -r, --remote NAME    Name of remote, defaults to 'origin'
    --verbose            Turn on verbose output
    --debug             Turn on debugging output
    --version           Print the version of this tool
    -h, --help          Show this help text
```

Examples

Close pull request with id 756:

```
$ git pr close 756
```

Configuration

None.
